Man suspected in wife's murder after her Fitbit data doesn't match timeline

Officials say the timeline given by Richard Dabate, killing his wife in their Connecticut home, is at odds with data collected by her wearable device.

Wearable technology is revolutionizing the way police and prosecutors in Connecticut have their way, it may help catch a murderer behind bars.

Judge rules pacemaker data admissible in court

The ruling could mean that data from medical devices is more widely used in court cases.
Do we have a relationship with the provider of the system/device?
Do they record/retain any communications data?
Where is the data stored?
What is our legal instrument to obtain this data?
Retention period for data?
Any questions?
